## Investment Objective and Strategy

BMO Advantaged Equal Weight Banks TACTIC™ Fund was established to provide tax-efficient, leveraged exposure to the BMO Equal Weight Banks Index ETF (TSX: ZEB). The Fund will employ leverage, including through the use of derivatives, to increase its exposure to ZEB to a maximum of 1.33:1 as at the time of borrowing.

## Underlying ETF

The BMO Equal Weight Banks Index ETF (ZEB) is designed to replicate, to the extent possible, the performance of the Solactive Equal Weight Canada Banks Index, net of expenses. ZEB invests in and holds the constituent securities of the Index in the same proportion as they are reflected in the Index. The Index includes Canadian exchange listed securities in the diversified bank industry which have a history of steady dividend growth. Securities in the Index are equally weighted to lessen security-specific risk.

## Fund Benefits

- Provides convenient and efficient equal weight exposure to six major Canadian bank equities
- The underlying equities have a history of steady dividend growth
- The Canadian banking system is lauded globally

### Risk Rating

As an additional guide to help you decide whether the Fund is appropriate for you, BMO Nesbitt Burns Inc. has assigned an investment risk rating of medium to this Fund. This rating represents the historical volatility of the Fund as measured by the standard deviation of its performance. The risk rating doesn't tell you how volatile the Fund will be in the future and doesn't necessarily correspond to your tolerance assessment. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund's returns, please see the Risk Factors section of the Fund's prospectus.

### No Guarantees

Like most mutual funds, this Fund doesn't have any guarantees. The value of the Fund changes frequently and past performance may not be repeated. You may not get back the amount of money you invest.
