Management Discussion of Fund Performance

Investment Objective and Strategies

The investment objective of the BMO Advantaged Equal Weight Banks TACTIC™ Fund (the "Fund") is to provide long-term tax-efficient compound growth through leveraged exposure to BMO Equal Weight Banks Index ETF (the "ETF"). The Fund does not make regular distributions.

The ETF is designed to replicate, to the extent possible, the performance of the Solactive Equal Weight Canada Banks Index (the "Index"), net of expenses. The ETF invests in and holds the constituent securities of the Index in the same proportion as they are reflected in the Index.

In order to achieve its investment objectives, the Fund has entered into derivative agreements with the Bank of Montreal (in this capacity, the "Counterparty") pursuant to which the Fund has agreed to acquire from the Counterparty units of the ETF at an agreed upon future date at a price equal to the per unit price at the date the derivative agreement was entered into.

The Fund has the ability to employ leverage, including through the use of derivatives. The maximum amount of permitted leverage for the Fund is 33 1/3% of its total assets as at the time of borrowing or incurring other leverage. If at any time leverage exceeds 40% of the total assets of the Fund, the portfolio manager of the Fund, Faircourt Asset Management Inc. (the "Portfolio Manager") will, as soon as practicable thereafter, cause the leverage to be reduced to at or below 33 1/3% of total assets. During the period from October 1, 2018 to March 31, 2019 (the "period") the Fund did not utilize any leverage.

Risk

The risks of investing in the Fund are discussed in the Fund's prospectus. There have been no material changes in the overall level of risk associated with an investment in the Fund during the period.

Results of Operations

The net asset value ("NAV") for the Shares at the end of the period, and the total return for the Shares during the period were as follows:

Shares	NAV (\$)	Total Return (%)
Class A	10	(0.60)
Class D	10	(0.10)
Class F	10	(0.10)
Class I	149,970	0.00

Recent Developments

On March 20, 2019, BMO Nesbitt Burns Inc. ("BMONBI"), the manager of the Fund (the "Manager"), announced that it is assessing the impact on the Fund of certain amendments to the *Income Tax Act* ("Tax Act") proposed by the Minister of Finance in the Federal Budget on March 19, 2019. Based on its preliminary assessment, the Manager has determined that, if the Tax Act were amended as proposed, the Fund would be affected by the changes. In order to benefit from limited transitional relief, the Manager has suspended the distribution of the Fund until further notice and will not accept new purchase orders for the Fund until it completes its assessment of the proposed legislative changes and determines what further actions might be advisable.

BMO Advantaged Equal Weight Banks TACTIC™ Fund

If the proposed amendments were enacted as proposed, certain derivative agreements that the Fund has entered into will likely be treated as “derivative forward agreements” for tax purposes, which would increase the income of the Fund and may result in non-refundable tax payable by the Fund.

The proposed amendments should not apply to existing derivative agreements of the Fund until after December 31, 2019 provided that the Fund satisfies the conditions for transitional relief. As stated, the Manager has suspended the distribution of the Fund in order that it may benefit from such relief. For this reason, the Manager does not anticipate any change to the tax treatment of the derivative agreements of the Fund for 2019.

If the Fund was to continue to carry on operations after December 31, 2019 in the same manner, the proposed amendments would likely result in an increase in the income of the Fund and may result in non-refundable tax payable by the Fund, all else equal.

The Manager will provide an update after it completes its assessment of the proposed amendments and determines what additional actions may be advisable.

Related Party Transactions

BMONBI, an indirect, wholly-owned subsidiary of the Bank of Montreal (“BMO”), is the manager of the Fund. From time to time, the Manager may, on behalf of the Fund, enter into transactions or arrangements with or involving other members of BMO Financial Group, or certain other persons or companies that are related or connected to the Manager (each a “Related Party”). The purpose of this section is to provide a brief description of any transaction involving the Fund and a Related Party.

Management Fee and Service Fee

The Manager provides certain services to the Fund, including but not limited to investment management and advisory services, paying sales and trailing commissions to registered dealers on the distribution of the Fund’s securities, advertising and promotional services, office overhead expenses related to the Manager’s activities, and all other services necessary or desirable to conduct and operate the Fund’s undertakings in an efficient manner. As compensation for its services, the Manager is paid a management fee (the “Management Fee”) of 1.05% per annum of the NAV of the Class A Shares, and 0.05% per annum of the NAV of the Class F Shares and the Class D Shares, in each case, accrued and calculated daily and paid monthly in arrears together with applicable taxes. The Fund does not pay a Management Fee in respect of Class I Shares.

The Management Fee paid to the Manager in respect of the Class A Shares includes a service fee of 1% per annum of the NAV of such series (the “Service Fee”). The Manager pays the Service Fee, plus applicable taxes, to registered dealers (which may include BMONBI and BMO InvestorLine Inc., an affiliate of the Manager) based on the NAV of Class A Shares held by clients of such dealers.

The Fund will also indirectly bear its share of the management fees of the ETF since such management fees reduce the net asset value (and likely the market price of the units) of the ETF. BMO Asset Management Inc., an indirect, wholly-owned subsidiary of BMO, is the management and administration services provider to the ETF.

Counterparty Fees

The Fund pays a counterparty fee to the Counterparty of up to 0.10% per annum on the total assets of the Fund exposed under the derivatives employed by the Fund. The counterparty fee, plus applicable taxes, is calculated and accrued daily and paid monthly in arrears.

The Fund will pay the Counterparty a hedge fee that would compensate the Counterparty for its costs of establishing, maintaining, unwinding or funding any transaction or asset necessary to hedge the Counterparty’s risks associated with the derivative agreement and its costs of providing collateral to the Fund. The hedge fee will be charged to the Fund monthly regardless of whether the Manager actually hedges. The Manager expects there to be no net cost to the Fund as the only anticipated hedge cost would be financing which will be offset by interest earned on the Fund’s cash.

Administration Fees

The Fund pays all of its operating expenses directly. These operating expenses include administration expenses, Fund expenses and interest costs related to the use of leverage. BMONBI provides leverage to the Fund. These operating expenses are allocated proportionately among the relevant series. If the Fund expenses are specific to a series, the Fund expenses are allocated to that series. Separate fees and expenses are negotiated and paid by each Class I investor. Further details about operating expenses can be found in the Fund’s most recent prospectus at www.sedar.com. The expenses charged to the Fund in respect of such charges during the period amount to \$3.

⁽¹⁾ This information is provided as at March 31 of the period shown.

⁽²⁾ Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. For the financial period-ended March 31, 2019, no commissions or other portfolio transaction costs were incurred by the Fund. As a result, the trading expense ratio for this period was zero.

⁽⁴⁾ The Fund's portfolio turnover rate indicates how actively the Portfolio Manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. For the financial period-ended March 31, 2019, no purchases or sales of portfolio securities were made by the Fund. As a result, the portfolio turnover rate for this period was zero.

* Operating expenses are paid by BMO Nesbitt Burns Inc. and management fees are paid directly to BMO Nesbitt Burns Inc. as negotiated with the investor.
