BMO AutoCallable Principal Protected Deposit Notes, Series 634 (USD) (F-Class) Due December 8, 2033,

Linked to Solactive Equal Weight Canada Banks 40 AR Index

7 - Year Term
Subject to the deposit notes being automatically called by Bank of Montreal

Annual Call Feature

9.75% per annum Potential Fixed Return

100% Principal Protected if held to Maturity

Investment Highlights

The deposit notes offered by the term sheet and the accompanying master information statement are deposit liabilities of Bank of Montreal. The objective of the deposit notes is to offer investors the potential for the deposit notes to be automatically called and receive, in addition to the stated deposit amount of USD $100.00 per deposit note, a variable return, if any, that will be determined based on the performance of Solactive Equal Weight Canada Banks 40 AR Index over the term of the deposit notes, as described below under "Payment at maturity" and "Automatic early redemption".

- **Autocall:** Automatic early redemption at par plus the variable return applicable to the relevant autocall payment date if the closing level is at or above the autocall level on any observation date.
- **Autocall level:** 105.00% of the initial level.
- **Potential fixed return**

Observation date	Fixed return
1	9.75%
2	19.50%
3	29.25%
4	39.00%
5	48.75%
6	58.50%
7	68.25%

Reference Portfolio	
Reference asset	**Ticker symbol**
Solactive Equal Weight Canada Banks 40 AR Index	SOLBEW40

The Solactive Equal Weight Canada Banks 40 AR Index is an adjusted return index. It aims to track the gross total return performance of the Solactive Equal Weight Canada Banks Index (the "underlying index"), calculated in Canadian dollars, less an adjusted return factor of 40 index points per annum that will be calculated daily in arrears (the "adjusted return factor"). The underlying index is an equally-weighted free-float market capitalization index of common stock of Canadian issuers. The methodology of the underlying index provides that the constituent securities fulfill the following criteria: primarily listed on the Toronto Stock Exchange; classified under the Factset Industries as "Major Banks" or "Regional Banks"; have a minimum share class free-float market capitalization of CAD $10 billion for new index members and CAD $5 billion for current index members; have a minimum average daily trading value of CAD $10 million, as calculated by the index sponsor; and must not have been removed from the index in the most recent rebalance. The closing level on October 30, 2026 was 981.45. The adjusted return factor divided by the closing level was therefore equal to 4.08% on October 30, 2026. Over the term of the deposit notes, the sum of the adjusted return factor will be approximately 280 index points, representing 28.55% of the closing level on October 30, 2026. The annual dividend yield of the underlying index on October 30, 2026 was 2.67%, representing an aggregate dividend yield of approximately 18.70% over the term of the deposit notes (assuming the dividend yield remains constant and the dividends are not reinvested). As of October 30, 2026, the adjusted return factor, expressed as a percentage of the closing level of the reference asset, exceeded the dividend yield of the underlying index. An investment in the deposit notes does not represent a direct or indirect investment in the reference asset. You have no right or entitlement to the dividends or distributions paid on the reference asset.

Additional Offering Details

Issuer	Bank of Montreal
Issuer rating	Moody's: Aa2; S&P: A+; DBRS: AA (long-term deposits > 1 year).
Reference asset	Solactive Equal Weight Canada Banks 40 AR Index (ticker: SOLBEW40).
Reference asset type	Adjusted Return Index, which reflects a return from the performance of the total return index tracked by the reference asset (the "underlying index") less a fixed number of index points per annum ("adjusted return factor"). The adjusted return factor is not an estimate or forecast of dividend and/or distribution yield. As of October 30, 2026, the adjusted return factor is greater than the dividend and/or distribution yield of the underlying index constituents. See "Information about the Reference Asset" and "Risk Factors" in the term sheet.
Currency of deposit notes	U.S. dollar (USD).
Stated deposit amount	USD $100.00 per deposit note.
Minimum investment	USD $2,000.00 (20 deposit notes).
Issue date	On or around December 8, 2026.
Final valuation date	December 1, 2033, subject to postponement if such date is not an exchange day or a market disruption event occurs.
Maturity date	December 8, 2033, subject to the deposit notes being automatically called by us.
Term	Approximately seven (7) years.
Observation and Payment Dates	See "Observation and Payment Dates" below.
Participation rate	5.00%
Autocall level	105.00% of the initial level.
Automatic early redemption	The deposit notes will be automatically redeemed on any autocall payment date if, on the corresponding autocall observation date, the closing level is at or above the autocall level. On any such redemption, you will receive a cash payment equal to the stated deposit amount multiplied by the sum of (1) 100.00% and (2) the variable return applicable to the relevant autocall payment date, in accordance with the following formula: $= USD\ \$100.00 \times (100.00\% + variable\ return)$
Variable return	For any given autocall payment date, the variable return is calculated in accordance with the following formula: $= fixed\ return + excess\ return$
Fixed return	Observation date — Fixed Return 1 — 9.75% 2 — 19.50% 3 — 29.25% 4 — 39.00% 5 — 48.75%

	6 58.50% 7 68.25% See "Observation and Payment Dates" below.
Excess return	For any given autocall payment date, the excess return is calculated in accordance with the following formula: $= max(0, (reference\ asset\ return - fixed\ return) \times participation\ rate)$
Initial level	The closing level on the issue date.
Final level	The closing level on the final valuation date.
Reference asset return	In respect of any given date, the reference asset return shall be determined in accordance with the following formula: $= \frac{closing\ level - initial\ level}{initial\ level}$
Final reference asset return	The reference asset return on the final valuation date.
Payment at maturity	If the deposit notes have not been redeemed, you will receive at maturity for each deposit note you then hold: • If the final level is at or above the autocall level, a maturity payment of at least USD $168.25 as defined in the automatic early redemption section. • If the final level is below the autocall level, a maturity payment equal to USD $100.00. **If the deposit notes have not been redeemed early, the payment you receive at maturity will be limited to the USD $100.00 stated deposit amount of each deposit note.**
Minimum payment	USD $100.00 per deposit note.
Additional tax information	For information about the Canadian federal income tax considerations associated with an investment in the deposit notes, see "Tax Considerations" in the master information statement. The deposit notes are denominated in U.S. dollars. For information about the Canadian federal income tax considerations associated with an investment in a deposit note denominated in a foreign currency, see "Tax Considerations – Currency Conversion" in the master information statement. For information about the eligibility of the deposit notes for investment for certain registered plans, see "Eligibility for Investment" in the master information statement.
Investor's right to cancel	You may cancel an order to purchase a deposit note (or cancel its purchase if the deposit note has been issued) by providing instructions to us through your financial advisor any time up to 48 hours after the later of (i) the day on which the agreement to purchase the deposit note is entered into, and (ii) deemed receipt of the term sheet and the master information statement. See "Description of the Deposit Notes — Investor's Right to Cancel the Agreement to Purchase a Deposit Note" in the master information statement.
Date of agreement	If you place an order to purchase a deposit note in person or electronically, the agreement to purchase the deposit note will be deemed to have been entered into on the third day after the later of (i) the day such purchase order is received, and (ii) five business days after the postmark date, if the term sheet and the master information statement are provided to you by mail, or the

	date the term sheet and the master information statement are actually received by you, if it is provided other than by mail. If an order to purchase a deposit note is received by telephone, the agreement to purchase the deposit note will be deemed to have been entered into at the time such purchase order is received.
Fundserv code	JHN4564
Calculation agent	BMO Capital Markets, or any successor appointed by us.
Selling agent	BMO Nesbitt Burns Inc., an affiliate of ours.
Secondary market/early trading charge	The deposit notes will not be listed on any securities exchange. BMO Capital Markets will use reasonable efforts under normal market conditions to provide for a daily secondary market for the sale of the deposit notes through the order entry system operated by Fundserv Inc. but reserves the right to elect not to do so in the future, in its sole and absolute discretion, without prior notice to you. Sale requests need to be initiated by 1:00 p.m. (Toronto time, or such other time as may hereafter be established by us or Fundserv) on a business day. Any request received after such time will be deemed to be a request sent and received in respect of the next following business day. Such a sale of a deposit note will be effected at a price equal to the bid price for the deposit note, determined by us in our sole and absolute discretion. No early trading charge will apply if the deposit notes are sold prior to maturity. See “Supplemental Plan of Distribution” in the term sheet.
No deposit insurance	The deposit notes will rank equally with all other deposit liabilities of Bank of Montreal. However, the deposit notes will not be deposits that are insured under the *Canada Deposit Insurance Corporation Act* or any other deposit insurance regime designed to ensure the payment of all or a portion of a deposit upon the insolvency of the deposit taking financial institution. There is no assurance that an investment in deposit notes will be eligible for protection under the Canadian Investor Protection Fund.
Suitability and appropriateness for investment	The deposit notes may not be a suitable investment for you. You should only make a decision to invest in deposit notes after carefully considering, with your advisor, the suitability of this investment in light of your investment objectives and the information contained in the term sheet and the master information statement. See “Suitability and Appropriateness for Investment” in the master information statement. You do not have the right to require us to redeem (that is buy from you or repay to you) the deposit note prior to maturity.
Risk factors	In deciding whether to invest in deposit notes, you should take into account various risks associated with such an investment. See the information under “Risk Factors” in the term sheet and in the master information statement.

Observation and Payment Dates

Observation date	Autocall observation date*	Autocall level (% of initial level)	Autocall payment date**	Fixed return	Excess return
1	December 1, 2027	105.00%	December 8, 2027	9.75%	(reference asset return - 9.75%) × 5.00%
2	December 1, 2028	105.00%	December 8, 2028	19.50%	(reference asset return - 19.50%) × 5.00%
3	December 3, 2029	105.00%	December 10, 2029	29.25%	(reference asset return - 29.25%) × 5.00%
4	December 2, 2030	105.00%	December 9, 2030	39.00%	(reference asset return - 39.00%) × 5.00%
5	December 1, 2031	105.00%	December 8, 2031	48.75%	(reference asset return - 48.75%) × 5.00%
6	December 1, 2032	105.00%	December 8, 2032	58.50%	(reference asset return - 58.50%) × 5.00%
7	December 1, 2033	105.00%	December 8, 2033	68.25%	(reference asset return - 68.25%) × 5.00%

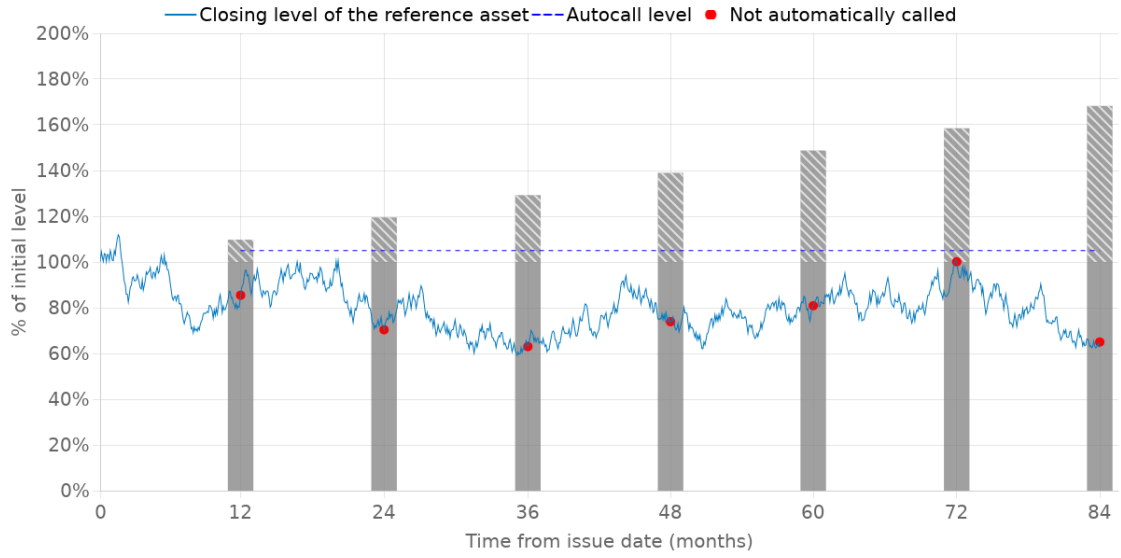

* If a scheduled autocall observation date is not an exchange day for any reason, then such date will be the immediately preceding exchange day. Further, such dates are each also subject to postponement if a market disruption event occurs.
** Each autocall payment date is subject to postponement if such date is not a business day or a market disruption event occurs.

How do the Deposit Notes work?

The following hypothetical examples demonstrate how the payment you may receive will be calculated and determined under three different scenarios. **The hypothetical closing levels used in these examples are for illustrative purposes only and should not be construed in any way as estimates or forecasts of the future performance of the reference asset or the return that you might realize on the deposit notes.** All hypothetical examples assume that no events described under "Description of the Deposit Notes — Certain Additional Terms for Deposit Notes Linked to a Reference Index" in the master information statement have occurred during the term. For ease of analysis, figures below have been rounded.

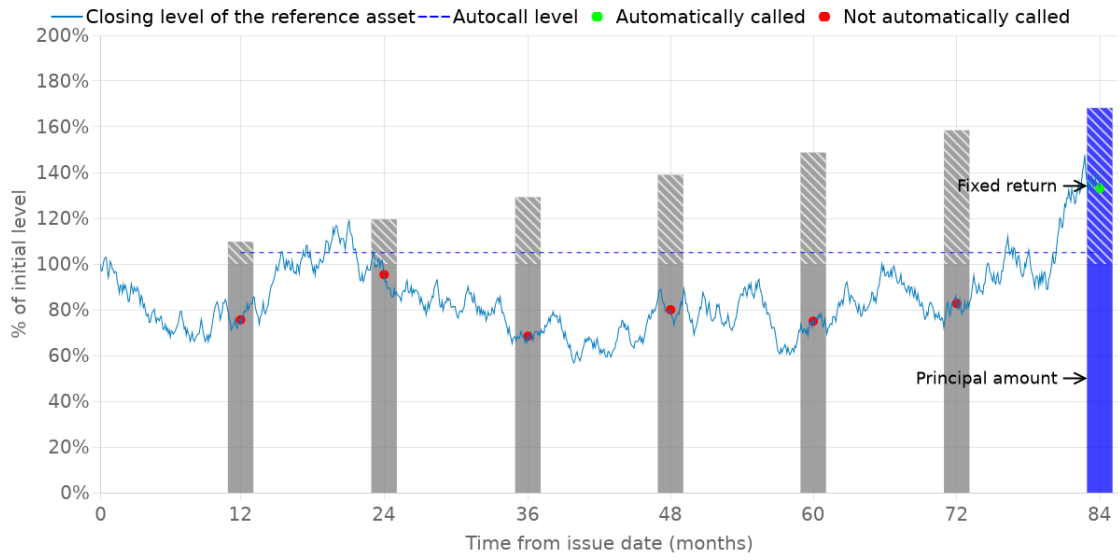

Autocall level
105.00% of the initial level

Example 1: Payment at Maturity (Negative Scenario)

In this hypothetical example, the closing level is below the autocall level on all autocall observation dates, so the deposit notes are not redeemed early. Furthermore, the final level is at 65.00% of the initial level, which is below the initial level, so the final reference asset return is −35.00%. Accordingly, you would receive a maturity payment of USD $100.00 per deposit note (which is equivalent to a compounded annual return of 0.00% on the deposit notes).

Example 2: Payment at Maturity (Positive Scenario)

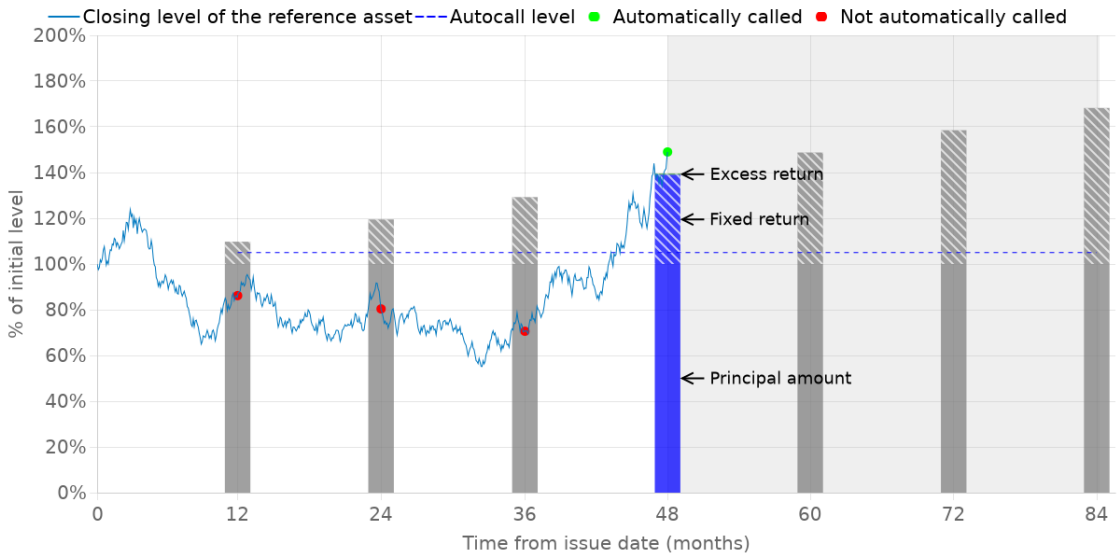

In this hypothetical example, the closing level is below the autocall level on all autocall observation dates until the final valuation date, where it is above. This results in the deposit notes being redeemed in accordance with the autocall conditions on the final valuation date. Furthermore, the final level is at 133.00% of the initial level, which is above the autocall level, so the final reference asset return is 33.00%.

Because the final reference asset return on the final valuation date is less than the fixed return, the excess return will be zero, and accordingly, you would receive a maturity payment equal to the stated deposit amount multiplied by the sum of (1) 100.00% and (2) the fixed return of 68.25%. Accordingly, you would receive a maturity payment of USD $168.25 per deposit note (which is equivalent to a compounded annual return of 7.71% on the deposit notes).

In this example, the maturity payment is calculated as follows:

$$\begin{aligned} \textit{Maturity payment} &= \textit{USD \$100.00} \times (100.00\% + \textit{variable return}) \\ &= \textit{USD \$100.00} \times (100.00\% + \textit{fixed return} + \textit{excess return}) \\ &= \textit{USD \$100.00} \times (100.00\% + 68.25\% + 0.00\%) \\ &= \textit{USD \$168.25} \end{aligned}$$

Example 3: Automatic Early Redemption

In this hypothetical example, the closing level is below the autocall level on all autocall observation dates until the fourth autocall observation date. This results in the deposit notes being redeemed early on the fourth autocall payment date. Furthermore, the closing level is at 149.00% of the initial level, which is above the autocall level, so the reference asset return is 49.00%.

Because the reference asset return on the fourth autocall observation date is greater than the fixed return, the excess return will be greater than zero, and accordingly, you would receive an autocall payment equal to the stated deposit amount multiplied by the sum of (1) 100.00%, (2) the fixed return of 39.00% and (3) the excess return. The excess return will be equal to 0.50%, which is calculated as the product of (1) the participation rate of 5.00% and (2) the reference asset return of 49.00% minus the fixed return of 39.00%. Accordingly, you would receive an autocall payment of USD $139.50 per deposit note (which is equivalent to a compounded annual return of 8.67% on the deposit notes).

In this example, the autocall payment is calculated as follows:

$$\begin{aligned} \textit{Autocall payment} &= \textit{USD \$100.00} \times (100.00\% + \textit{variable return}) \\ &= \textit{USD \$100.00} \times (100.00\% + \textit{fixed return} + \textit{excess return}) \\ &= \textit{USD \$100.00} \times \left(100.00\% + 39.00\% + 5.00\% \times (49.00\% - 39.00\%)\right) \\ &= \textit{USD \$139.50} \end{aligned}$$

Disclaimer

This document should be read in conjunction with the term sheet dated November 12, 2026 with respect to the offering of the deposit notes described above (the "**term sheet**") and the accompanying master information statement dated November 10, 2025 (the "**master information statement**", and together, the "**information statement**"). You may request information about the deposit notes or a copy of the information statement by calling BMO Capital Markets at 1-866-864-7760 to speak to someone in English and 1-866-529-0017 to speak to someone in French. A copy of the information statement is also posted at www.bmonotes.com. You should carefully review the specific terms of the deposit notes described in the information statement before making an investment decision. **Investing in the deposit notes is subject to risks not associated with an investment in conventional bank deposits. The deposit notes are structured products and are not designed as alternatives to fixed income or money market investments. Prospective investors should carefully consider all of the information set forth in the term sheet and the master information statement and, in particular, should evaluate the specific risk factors set forth under "Risk Factors" in the term sheet and "Risk Factors" in the master information statement.** References in this document and the information statement to "we," "our" or "us" are to Bank of Montreal, and not any of its subsidiaries, unless the context indicates otherwise. See "Key Terms" in the master information statement for the definition of certain other terms that are used in this document.

The deposit notes will not be deposits that are insured under the Canada Deposit Insurance Corporation Act or any other deposit insurance regime designed to ensure the payment of all or a portion of a deposit upon the insolvency of the deposit taking financial institution. See "Description of the Deposit Notes — Additional Deposit Note Details — Ranking" in the master information statement.

Bank of Montreal does not guarantee that you will receive a variable return in addition to the stated deposit amount at maturity. You must be willing to accept the risks that (1) your actual yield on the deposit notes may be lower than the yield on our conventional deposits, (2) the deposit notes may be automatically redeemed prior to maturity beginning on the first autocall payment date specified below, and (3) the adjusted return factor applied to and reducing the closing level of the reference asset is higher than the dividend and/or distribution yield of the underlying index constituents. The more the adjusted return factor exceeds the dividend and/or distribution yield of the underlying index constituents, the more likely the reference asset will underperform a price return version of the underlying index over the term of the deposit notes. Each of these risks will depend on the performance of the reference asset specified herein. Although you will have exposure to the performance of the reference asset, you will not receive dividends or distributions with respect to the reference asset or participate in any appreciation of the reference asset.

The above summary is for information purposes only and does not constitute an offer to sell or a solicitation to purchase deposit notes. The offering and sale of deposit notes may be prohibited or restricted by laws in certain jurisdictions. Deposit notes may only be purchased where they may be lawfully offered for sale and only through individuals qualified to sell them. Unless the context otherwise requires, terms not defined herein will have the meaning ascribed thereto in the term sheet. A copy of the term sheet and the master information statement is posted at www.bmonotes.com.

Key Information for Investors (Oral Disclosure)

Where an investor is considering a purchase of deposit notes, the financial advisor must orally disclose all of the following information to the investor:

Offering Overview:

1. The BMO AutoCallable Principal Protected Deposit Notes, Series 634 (USD) (F-Class) Due December 8, 2033, Linked to Solactive Equal Weight Canada Banks 40 AR Index will be issued by Bank of Montreal on or about December 8, 2026 and will mature on December 8, 2033. The term of the deposit notes is approximately 7 years. The stated deposit amount of USD $100.00 per deposit note will be repaid at maturity, subject to automatic early redemption.

2. The objective of the deposit notes is to offer investors the potential for the deposit notes to be automatically called and receive, in addition to the stated deposit amount of USD $100.00 per deposit note, a variable return, if any, that will be determined based on the performance of Solactive Equal Weight Canada Banks 40 AR Index over the term of the deposit notes. The reference asset is an adjusted return index. It aims to track the performance of the underlying index less the adjusted return factor.

3. The deposit notes will be automatically redeemed on any autocall payment date if, on the corresponding autocall observation date, the closing level is at or above the autocall level. On any such redemption, you will receive the stated deposit amount plus a variable return, for each deposit note, equal to the fixed return, plus the product of the difference between the reference asset return and the fixed return, and the participation rate. If the deposit notes have been automatically redeemed, you will not be entitled to receive any subsequent payments in respect of the deposit notes.

4. If the deposit notes have not been redeemed prior to maturity, you will receive at maturity a payment, for each deposit note, determined as follows: (i) if the final level is at or above the autocall level, a payment equal to the fixed return, plus the product of the difference between the reference asset return and the fixed return, and the participation rate; (ii) if the final level is below the autocall level, a payment equal to the stated deposit amount of USD $100.00 per deposit note.

5. You cannot elect to receive any payments prior to maturity. No variable return or distributions will be paid during the term of the deposit notes other than the stated deposit amount and the variable return in the event the deposit notes are automatically called. It is possible that no variable return will be payable on the deposit notes.

Fees and Expenses:

6. No expenses will be paid out of the proceeds of this offering to BMO Nesbitt Burns Inc. for its services as selling agent. The deposit notes are available to investors who participate in programs that already charge a fee for the advice they are receiving (for example, dealer sponsored “fee for service” or wrap programs) or pay their advisor an hourly or annual asset based fee rather than commissions on each transaction and who purchase the deposit notes in connection with such programs.

Listing and Secondary Market:

7. The deposit notes will not be listed on any securities exchange. BMO Capital Markets will use reasonable efforts under normal market conditions to provide for a daily secondary market for the sale of the deposit notes through the order entry system operated by Fundserv Inc. but reserves the right to elect not to do so in the future, in its sole and absolute discretion, without prior notice to you. Such a sale of a deposit note will be effected at a price equal to the bid price for the deposit note, determined by us in our sole and absolute discretion. As a result, you may receive less than the stated deposit amount even if the performance of the reference asset has been positive. BMO Capital Markets is under no obligation to facilitate or arrange for a secondary market and may suspend any secondary market at any time.

Early Trading Charge:

8. No early trading charge will apply if the deposit notes are sold prior to maturity.

Tax Consequences:

9. The Canadian income tax consequences of investing in deposit notes are described in the information statement. However, in summary, (i) if you hold deposit notes on an autocall payment date or at maturity, you will be required to include in your income the amount, if any, by which the payment on such date exceeds the stated deposit amount, and (ii) on a disposition of a deposit note by you prior to maturity, you will be required to include in income as accrued interest the amount, if any, by which the price for which the deposit note was disposed of exceeds the stated deposit amount.

Risk Factors:

10. The deposit notes may not be suitable for all investors and in deciding whether to invest in deposit notes you should take into account various risks associated with such an investment. The information statement contains a complete description of these risks, which include the following:

    The deposit notes may not be suitable for you. You should decide to invest in the deposit notes only after carefully considering with an advisor whether the deposit notes are a suitable investment in light of the information set out in the information statement. Neither we nor BMO Capital Markets make any recommendation as to whether the deposit notes are a suitable investment for you. Investments in the deposit notes are uncertain in nature in that they could produce no return. An investment in the deposit notes is only suitable for investors with a medium-term investment horizon and who are prepared to assume risk with an investment whose return is dependent upon the closing level on the observation dates. The deposit notes are not a suitable investment for you if you require a guaranteed return. The deposit notes are not conventional deposits or indebtedness in that they do not provide you with a guaranteed return or income stream prior to maturity and the return at maturity is not calculated by reference to a fixed or floating rate of interest that is determinable prior to maturity. The return you may receive on your principal investment could be less than the return that could be earned on other investments. An investment in the deposit notes may not reflect the full opportunity cost to you when the factors that affect the time value of money are considered. The deposit notes are not a suitable investment for you if you do not understand their terms or the risks involved in holding the deposit notes.

    The deposit notes may not perform positively if the underlying index performance does not offset the impact of the adjusted return factor. As of October 30, 2026, the adjusted return factor exceeded the dividend and/or distribution yield of the underlying index constituents, and as a result the impact of reinvested dividends and/or distributions is expected to be less than the impact of the adjusted return factor over the term of the deposit notes. The more the adjusted return factor exceeds the dividend and/or distribution yield of the underlying index constituents, the more likely the reference asset will underperform a price return version of the underlying index (which does not reflect the reinvestment of dividends and/or distributions paid on the underlying index constituents) over the term of the deposit notes. In particular, the closing level of the reference asset on an autocall observation date or the final valuation date could be below the closing levels of a price return version of the underlying index on such dates, resulting in the deposit notes not being called or the downside protection being unavailable, even in circumstances where the closing levels of a price return version of the underlying index would have resulted in the deposit note being called or downside protection being available. Further, because the adjusted return factor is a fixed-point value, its impact proportionally increases as the closing level of the underlying index declines. As a result, the reference asset is more likely to underperform a price return version of the underlying index in falling markets. This underperformance is more likely, and may be greater, where dividends and/or distributions paid on the underlying index constituents do not increase sufficiently over the term of the deposit notes to offset the impact of the adjusted return factor.

The application of the adjusted return factor may materially affect the performance of the reference asset over time. Because the adjusted return factor is applied on an ongoing basis, the performance of the reference asset will differ from the performance of the underlying index and from a direct investment in the constituent securities of the underlying index. Such differences may increase over time and may be affected by the compounding effect of returns.

Changes in the dividend/distribution policies of the issuers of the constituent securities of the underlying index can significantly impact the performance of the reference asset. The adjusted return factor does not adjust to changes in dividend/distribution policies of the issuers of the underlying index constituents. This can substantially increase the risk that the deposit notes may not perform positively, particularly during periods of significant changes in dividend/distribution policies. Historical dividend/distribution payments by the underlying index constituents are not indicative of future payments, and these payments are subject to change and can be impacted by various factors affecting the respective issuers, including their financial position, cash requirements, applicable legal and regulatory requirements and the state of financial markets.

The variable return may not be payable or may be limited. The variable return payable on the deposit notes, if any, is uncertain and is based on the performance of the reference asset. An investment in the deposit notes will not track a direct investment in the reference asset and therefore the variable return that may be payable at maturity may be less than the return that would have been realized from such a direct investment. If the final level is below the autocall level, no variable return will be payable, although in all cases you will be entitled to receive the deposit amount at maturity. You will not have any ownership interests or related rights (including, without limitation, any voting rights or rights to receive dividends or distributions) with respect to the reference asset.

The timing of redemption is uncertain. The deposit notes will be subject to automatic early redemption. If the deposit notes are redeemed early, you will receive a redemption payment prior to the stated maturity date and will not receive any further payments after such date.

The return on the deposit notes, if any, is uncertain until redemption or maturity. The amount of any return you receive on the deposit notes will depend on the performance of the reference asset. The historical performance of the reference asset should not be considered as an indication of the future performance. You should understand that the risk involved in investing in the deposit notes is greater than that associated with other types of deposits or fixed income investments.

The deposit notes may be automatically redeemed prior to maturity. On any autocall observation date, the deposit notes will be automatically redeemed if the closing level on that autocall observation date is at or above the autocall level. As a result, if the reference asset performs in a way that would otherwise be favorable, the deposit notes are likely to be automatically redeemed. If the deposit notes are automatically redeemed prior to maturity, you may not be able to reinvest your funds in another investment that provides a similar yield with a similar level of risk.

There may be fluctuations between the value of the deposit notes in U.S. dollars compared to the Canadian dollar. The deposit notes are denominated in U.S. dollars. For the purposes of the Income Tax Act (Canada) and the regulations thereunder (collectively, the "Tax Act"), all U.S. dollar amounts relating to the acquisition, holding or disposition of a deposit note must generally be expressed in Canadian dollars using the appropriate exchange rate determined in accordance with the detailed rules in the Tax Act in that regard. As a result, you may realize income, capital gains or capital losses by virtue of fluctuations in the value of the U.S. dollar relative to the Canadian dollar.

The deposit notes are subject to risk factors relating to the reference asset. The variable return, if any, payable on the deposit notes is based on the performance of the reference asset. Accordingly, certain risk factors applicable to the reference asset, the index sponsor, or the direct or indirect underlying interests are also applicable to an investment in the deposit notes to the extent that such risk factors could adversely affect the performance of the reference asset.

Holders should recognize that it is impossible to know whether the closing level at any time will rise or fall. The closing level will be influenced by the performance of the reference asset and the performance of the underlying index will be impacted by changes in the market prices of the direct or indirect underlying interests and the outlook for such interests and by general economic, industry and market trends. These factors are beyond the control of Bank of Montreal. Historical performance of the reference asset should not be considered as an indication of the future performance.

The return on the deposit notes is calculated with reference to the performance of the reference asset which aims to track the gross total return performance of the underlying index subject to the adjusted return factor. Although the underlying index is a gross total return index that reflects the price changes of the constituent securities of the underlying index and any dividends and distributions paid in respect of such securities, without deduction of any withholding tax or other amounts to which an investor holding the constituent securities of the underlying index would typically be exposed, an investment in the deposit notes is not the same as making a direct investment in the constituent securities of the underlying index, including the fact that you will not have the right to receive any dividends, distributions or other income or amounts accruing or paid on such securities. In addition, the adjusted return factor is not representative of an estimate or a forecast of any dividends that may be paid or payable, or of any distributions that may be made, now or in the future on the constituent securities of the underlying index.

You should also recognize that the index sponsor has no obligations with respect to the deposit notes or to you and that changes to the policies of the index sponsor could affect amounts payable on the deposit notes and the value of the deposit notes in any secondary market. In addition, the reference asset could be replaced with a replacement index by the index sponsor.

Bank of Montreal and the selling agent have not performed any due diligence investigation or review of the reference asset, any of the direct or indirect underlying interests comprising the reference asset or any sponsor. Any information relating to the reference asset, any of the direct or indirect underlying interests comprising the reference asset or any sponsor, was derived from and is based solely upon publicly available sources and its accuracy cannot be guaranteed. None of Bank of Montreal, the selling agent, or any of their respective affiliates or associates has any obligation or responsibility for the provision of future information in respect of the reference asset, any of the direct or indirect underlying interests comprising the reference asset or any sponsor. Investors shall have no recourse against Bank of Montreal, the selling agent or any of their respective affiliates or associates in connection with any information relating to the reference asset, any of the direct or indirect underlying interests comprising the reference asset or any sponsor that is not contained in the information statement. The deposit notes are not sponsored, endorsed, sold or promoted by any sponsor or any of its affiliates and none of them makes any representation or warranty, express or implied, to you or any member of the public regarding the advisability of investing in securities generally or in the deposit notes particularly. Prospective purchasers should undertake an independent investigation to determine if an investment in the deposit notes is suitable for them.

This is not a complete description of the risks applicable to the reference asset, the index sponsor, or the direct or indirect underlying interests. Information about the reference asset and the underlying index can be found at www.solactive.com.

The deposit notes will not be listed on any securities exchange and you may not be able to sell them prior to maturity. The deposit notes are designed for investors who are prepared to hold the deposit notes to maturity. The deposit notes will not be listed on any securities exchange. If you sell the deposit notes in the secondary market prior to maturity, you may receive a price substantially less than the deposit amount.

Special circumstances may impact the timing or calculation of amounts payable on the deposit notes. In certain circumstances, BMO Capital Markets may, as it determines appropriate, (i) adjust the components or variables in calculating amounts payable on the deposit notes (ii) defer the timing of the determination of a closing level or the calculation of amounts payable on the deposit notes (iii) replace a reference asset with a comparable reference asset, or (iv) on the occurrence of an Extraordinary Event, instead of paying the variable return, if any, on the maturity date pay an Early Payment Amount determined by the calculation agent. See “Special Circumstances” in the master information statement for a discussion of these circumstances.

Conflicts of interest. We and BMO Capital Markets, whether in its capacity as selling agent or calculation agent, and any of our respective affiliates, may from time to time, in the course of our normal business operations, hold interests directly or indirectly linked to the reference asset, or hold securities of, extend credit to or enter into other business dealings with the issuers of any securities underlying the reference asset, including under hedging arrangements relating to the deposit notes. In addition, BMO Capital Markets, which has undertaken to use reasonable efforts to provide a secondary market, is our affiliate. We and BMO Capital Markets have agreed that all such actions taken by it shall be taken based on normal commercial criteria in the particular circumstances. Conflicts may also arise because we and/or our affiliates may engage in trading activities related to the reference asset or any underlying securities that are not for your account or on your behalf. These trading activities may present a conflict between your interest in the

deposit notes and the interests that we and/or our affiliates will have in their proprietary accounts in facilitating transactions, including block trades and options and other derivatives transactions, for our respective customers and in accounts under management. These trading activities, if they influence the reference asset, could be adverse to your interests. Moreover, our subsidiaries (including BMO Capital Markets) have published, and in the future expect to publish, research reports with respect to the reference asset and/or some or all of the underlying securities. This research is modified from time to time and may express opinions or provide recommendations that are inconsistent with purchasing or holding the deposit notes. The foregoing actions by us, BMO Capital Markets and our respective affiliates may not take into account the effect, if any, of such actions on the deposit notes or the variable return that may be payable on the deposit notes. In addition, BMO Capital Market will act as calculation agent and we have no obligation to retain an independent person to make or confirm the determinations or calculations made for the deposit notes.

Common shares of Bank of Montreal. The common shares of Bank of Montreal are included in the underlying index and the decisions and actions of the board of directors and management of Bank of Montreal will not take into account the effect, if any, of such decisions and actions on an index or investors' interests generally.

No deposit insurance. The deposit notes will not be deposits that are insured under the Canada Deposit Insurance Corporation Act or any other deposit insurance regime designed to ensure the payment of all or a portion of a deposit upon the insolvency of the deposit taking financial institution. Therefore, a holder will not be entitled to Canada Deposit Insurance Corporation protection. There is no assurance that an investment in deposit notes will be eligible for protection under the Canadian Investor Protection Fund.

Legislative, regulatory and administrative changes may affect the deposit notes. Changes in laws, regulations or administrative practices, including with respect to taxation, could have an impact on you. The Bail-In Regulations, which came into effect in September 2018, prescribe the types of shares and liabilities that will be subject to a Bail-In Conversion. In general, any senior debt with an initial or amended term to maturity (including explicit or embedded options) greater than 400 days, that is unsecured or partially secured and has been assigned a CUSIP or ISIN or similar identification number would be subject to a Bail-In Conversion. Shares, other than common shares, and subordinated debt would also be subject to a Bail-In Conversion, unless they are non-viability contingent capital. However, structured notes meeting the requirements of the Bail-In Regulations will not be subject to a Bail-In Conversion. Accordingly, it is not expected that the deposit notes will be subject to a Bail-In Conversion.

The deposit notes have not been rated. There can be no assurance that, if the deposit notes were rated, they would have the same rating as our other unsubordinated indebtedness.

The deposit notes are subject to our credit risk. The deposit notes are subject to our credit risk. The deposit notes are not guaranteed by any entity. Any actual or anticipated changes to our credit ratings or credit spreads may adversely affect the value of the deposit notes.

Other Important Information:

11. Bank of Montreal may amend the terms of the deposit notes without your consent after the deposit notes have been issued if Bank of Montreal and BMO Capital Markets agree that the amendment would not materially and adversely affect your interests. In all other cases amendments must be approved by the votes of holders representing at least two-thirds of the outstanding deposit notes represented at a meeting convened to consider the amendment.

12. If you place an order for deposit notes in person or electronically, the agreement to purchase the deposit notes will be deemed to have been entered into on the third day after the later of (i) the day your purchase order is received, and (ii) five business days after the postmark date, if the information statement is provided to you by mail, or the date the information statement is actually received by you, if it is provided other than by mail. If an order to purchase deposit notes is received by telephone, the agreement will be deemed to have been entered into at the time your purchase order is received.

13. You may cancel an order to purchase a deposit note (or cancel its purchase if the deposit note has been issued) by providing instructions to us through your financial advisor any time up to 48 hours after the later of (i) the day on which the agreement to purchase the deposit note is entered into, and (ii) deemed receipt of the information statement. You will receive the information statement by mail with the trade confirmation.

14. You may request information about the deposit notes or a copy of the information statement by calling BMO Capital Markets at 1-866-864-7760 to speak to someone in English and 1-866-529-0017 to speak to someone in French. A copy of the information statement will be posted at www.bmonotes.com. During the term of the deposit notes, you may inquire as to the net asset value of, and the formula for determining variable return under, a deposit note by contacting BMO Capital Markets at the above numbers.

15. This is only a summary of certain terms of the deposit notes. You should read the information statement for more detailed and complete information on all aspects of the deposit notes.
